

Emergency Shelter Scoring Guidelines

Material to be provided by Station Master:

Nothing

A strong wind is beginning to develop out of the west and snow is beginning to fall. The patrol will create an improvised whole patrol shelter from tarp, ropes, and poles. The patrol shelter will be judged on the following qualities:

- The whole patrol can fit in the shelter – 20 points
 - Subtract 5 points (up to 20) for each member that can't fit in.
- The shelter keeps the patrol dry and warm by being oriented correctly to block the wind and falling snow – 15 points
- The shelter should be able to survive a blizzard. This should be checked by shaking and tugging on the shelter. Use a reasonable amount of force. The judge may use his discretion in awarding up to 15 points.

Total points possible: 50 points
