

La Femme Fatale

Girls have long been a part of the [Bermuda Triangle of Scouting](#). More than one Scout has missed achieving the rank of Eagle due to being sucked into its vortex by this seductive part of the triad. In order to help Scouts recognize the dangers that girls pose to achieving the rank of Eagle, we offer the following mathematical proof:

Proof that Girls are Evil

Girls require time and money. Therefore:

Equation 1: $\text{Girls} = \text{Time} \times \text{Money}$

And since we all know that “Time is Money”:

Equation 2: $\text{Time} = \text{Money}$

By simple substitution of Money for Time in Equation 1:

Equation 3: $\text{Girls} = \text{Money} \times \text{Money}$

Equation 3 restated: $\text{Girls} = \text{Money}^2$

It has often been shown that “Money is the root of all Evil”:

Equation 4: $\text{Money} = \text{Evil}$

Therefore, by substituting in Evil for Money in Equation 3 and simplifying:

$\text{Girls} = (\text{Evil})^2$

We are forced to conclude that:

$\text{Girls} = \text{Evil}$

Based upon this proof, it is best for Scouts to avoid *la Femme Fatale* in order to escape the clutches of the Bermuda Triangle of Scouting; thereby maximizing their chances of success in achieving the rank of Eagle.
