

Report to the Emperor Event Scoring Guidelines

Within a limited amount of time, the Contubernium quietly (no talking or writing) observes important information and equipment about the enemy camp. The Contubernium touches nothing. After time is up, the team will leave the enemy camp and recall what features and mistakes they observed to the Legatus. The Legatus may ask questions of his spies about the enemy encampment. Scores will be based on how observant the Contubernium is.

Material to be provided by Station Master:

Set up a campsite. There should be a total combination of 15 obvious mistakes and/or unusual features about the campsite. Prepare a list of questions to determine how observant the Contubernium was. Five points are awarded for each mistake/unusual feature correctly identified up to 65 points. 1 point is deducted for each obvious misidentification.

Total points possible: 65 pts
