

Event #4: Unexploded Bomb Disposal Scoring Guidelines

Material to be provided by Station Master:

Clipboard
Pencil
Bomb disposal device
Soup can (empty)
Water
Cones
Stopwatch
Event score sheet

While scouting a strategic structure, the patrol comes across an explosive device. No one can use the structure until the bomb is safely disposed of. The patrol must move the explosive device (a soup can 90% full of water) to a safe bomb disposal area (a distance of about 30 feet). It is unknown if or when the bomb will go off. To protect everyone and the structure, they must use a special bomb disposal device. The bomb disposal device is a small round piece of ½" plywood (12 inches in diameter) with eight 6-foot ropes attached through holes drilled equidistant around the perimeter. The patrol leader will carefully, without spilling any contents, place the bomb in the center of the bomb disposal device. The patrol members, then holding only the ends of the ropes, will use the device to transport the bomb to the disposal area. If the bomb falls over or any contents are spilled, the explosive device is considered prematurely detonated and the patrol must start over. Fastest successful bomb disposal time wins.

20 points will be awarded for participation

Points awarded for speed of disposing bomb

1 st place	40 pts
2 nd place	35 pts
3 rd place	30 pts
4 th place	25 pts
5 th place	20 pts
6 th place	15 pts
7 th place	10 pts
8 th place	5 pts
9 th place and lower	0 pts

Total maximum points possible: 60 points
