Biking Relay Races

1. **Slalom:** Set cones 6 feet apart in a 120 foot straight line. Mark a starting line. Rider cycles from the starting line weaving between the cones, around the last cone, and back to the starting line. Next Scout rides. If a rider touches a cone or touches the ground, he must start his ride over. Fastest average patrol time wins. Bicycle helmets are required.
2. **Marble Drop:** Draw a starting line. Place four different sized cans in a straight line 8-10 feet apart. Each Scout gets 4 marbles. Scout rides past the cans and drops a marble in each one. Score one point per marble successfully dropped into the biggest can, 2 points per marble for second biggest can, etc. Lose one point for touching the ground or a can. Highest average patrol score wins. Bicycle helmets are required.
3. **Turtle Relay:** Using cones or ropes, create a 3foot wide path about 50 feet long. Mark the ends of the path with chalk. Split the team in half with half at each end of the path. Using one bike, a Scout rides from one end of the path to the other as SLOWLY as possible. When the front tire crosses the end line, time is stopped until the next Scout starts his ride. Time is deducted for touching the ground or having a tire touch the path edges. Slowest average patrol time wins. Bicycle helmets are required.
